

Automated Timetable Generator

Complete offline tutorial

Follow the highlighted controls in the application Help section.

1. Connection and projects

Wait until the top-right badge shows Local database or Server database with counts.

Click New for a blank project or Open for an existing .tproj file. Use Save / Save as regular

2. Buildings, semesters, rooms, teachers

Click + Building. Then click + Semester to rename the presets 1â 8 and use the up/down

Add rooms in their buildings, then teachers. Add courses, assign teachers, select semester

3. Grid, scheduling and export

Choose shift, days per week, start/end time, class duration and break. Press Generate grid

Drag course cards into free cells. Check clashes, Save to DB, then Save the project. Export
